

Full Stack Project

Project description:

Title: The WagePage

Description:

The WagePage is a comprehensive platform designed for companies, offering administrators a streamlined overview of employee wages, with the ability to easily adjust and update them. Administrators also have the capability to remove deceased or absent animals from the farm. Employees and caretakers, meanwhile, can access detailed information about their colleagues and view their own wages. They can also track the animals they are responsible for, though they do not have permission to remove them. Additionally, the platform ensures secure login and logout functionality for all users.

User Story 1:

As a User

I'm able to log in as an administrator, caretaker or employee

So that I can get an overview of the wages of all employees as administrator and as employee or caretaker, I get an overview of the other employee's information

Wireframe

A hand-drawn wireframe for a login page. At the top, the word "LOGIN:" is written in large, bold, hand-drawn capital letters and underlined. Below it, the word "NAME:" is written in hand-drawn capital letters, followed by a rectangular input field. Below the "NAME:" field, the word "PASSWORD:" is written in hand-drawn capital letters, followed by another rectangular input field. At the bottom right, there is a rectangular button with the word "LOGIN" written inside in hand-drawn capital letters.

Acceptance Criteria:

- A login page is displayed with name password input fields and a login button.
- If the login button is pressed with wrong credentials in the input fields, display "Login failed..."
- If the login button is pressed with right credentials in the input field, display "Login successful"

User Story 2:

As an Employee or caretaker or Administrator
I'm able to click on log out after I logged in
So that I can log out or can log in with other credentials

Wireframe

Acceptance Criteria:

- If you press the logout button in the ul you get logged out so that you can login again.

User Story 3:

As an Administrator

I'm able to click on different employees/caretakers

So that I can get an overview of the employees their wages and if wanting to do, change these wages

Wireframe

TOTAL SERV. BONUS

JOHN	DOE	1200	5	200
JANE	DOE	1200	4	200

CHANGE THE WAGE:

Acceptance Criteria:

- A table is displayed with all users
- If you click on a specific person there will be a table that pop's up with the option to change the wage of this user.

User Story 4:

As an employee/caretaker/administrator

I'm able to click on a coworker's name to view my coworkers contact information

So that I can see extra information of this employee (name, age and workspace)
